***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 23, 2003 has been entered.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Rochelle Seide, Ph.D., on April 22, 2004.

The application has been amended as follows:

On the first page of the claims, please delete the term "Claims" and replace it with "What is claimed is:".

In the claims, please enter the following amendments:

11. The recombinant non-yeast cDNA according to claim 9, wherein the region having a high CTC codon or high CTC+CTG codon content of leucine encodes a polypeptide that contains 2, 3, 4, 5 or 6 leucines per 10 consecutive amino acids, or contain at least 2 or 3 adjacent leucines.
  
14. A recombinant non-yeast DNA encoding a plant protein of interest, wherein an unmodified DNA corresponding to said recombinant non-yeast DNA contains a region having a high content of codons that are poorly suited for expression in yeasts, wherein a number of the codons in the 5' region of the DNA that are poorly suited for expression in yeasts are replaced in said 5' region of said recombinant non-yeast DNA with synonymous codons coding for the same amino acid that are well- suited for expression in yeasts, wherein the number of replaced codons is sufficient to permit expression in yeasts, and wherein replaced codons are only in the 5' region.
